SUMMARY

Systems Engineer and full stack developer with 3+ years of experience in Java, Spring Boot and Angular, from internal tools to SaaS products in production. I currently lead a development team while staying hands-on. I own projects end to end: analysis, architecture, development, deployment and support, with a solid grounding in application security (OWASP) and process automation.

EXPERIENCE

Software Development Professional II · Technical Team Lead
Sep 2026 - Present

Méderi · *Hospital network · Hybrid*

- Lead a team of 3 developers using Kanban: analyze and design the technical solution for each project before assigning it, distribute the work and track progress in GitLab.
- Build applications for hospital operations with NestJS (backend) and Angular (frontend).
- Standardizing the team's technical documentation by migrating docs for ~30 delivered applications to centralized GitLab wikis.

Co-founder · Full Stack Developer
2026 - Present

Celvo · *SaaS product ecosystem · celvo.dev*

- **Kalendapp (kalendapp.celvo.dev):** live booking SaaS for service businesses (salons, spas, clinics): multi-location, staff schedules and commissions, roles and permissions, payments, cash register, reports and subscription plans.
- Hexagonal architecture with Spring Boot, Angular and PostgreSQL; multi-tenant JWT authentication, Flyway migrations and CI/CD with GitHub Actions and Docker to staging and production.

JavaScript Developer II
Jun 2026 - Jul 2026

GSE - Gestión de Seguridad Electrónica S.A. · *Electronic security and digital certification*

- Developed Java microservices with Spring Boot and PostgreSQL, and front-end interfaces in Angular and React.

Development Engineer
Mar 2024 - May 2026

Fundación Cardiovascular de Colombia · *Cybersecurity Department*

- **User offboarding:** automated account deactivation in Active Directory, SAHI and Zimbra in a single workflow. It used to be done manually by several people, and accounts stayed active up to 2 weeks after an employee left.
- **VulnTracker:** central platform to log and manage the vulnerabilities found across all of the Foundation's applications (Spring Boot + Angular, secure login, dashboard and PDF reports).
- **AppBox:** repository that centralizes software installers for the organization's computers, used by IT analysts, with role-based access.
- Enforced the no-personal-files policy on corporate devices with a smart cleanup script (Windows and Linux) and an Android app for corporate phones.
- Also built a custom Wi-Fi hotspot portal for the hospital, a lookup tool for email accounts with external-sender filtering, a CSP for Angular apps and cybersecurity awareness games.
- Taught a development best-practices course to the software factory team.

Junior Development Engineer
Sep 2022 - Jul 2023

Fundación Cardiovascular de Colombia · *Maintenance and improvement of internal apps, bug fixing and testing*

Software Development Intern
Jan 2022 - Jun 2022

SUTELABS S.A.S. · *Software development, testing and documentation*

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, NestJS, Node.js, Express, REST APIs, JWT, microservices
Frontend: Angular (Signals, SSR), TypeScript, JavaScript, RxJS, Angular Material, SCSS, React
Data: PostgreSQL, MySQL, Flyway
Architecture & security: Hexagonal, layered, SOLID, multi-tenant, OWASP, CSP
DevOps & tools: Docker, GitHub Actions, GitLab, Git, Postman, Vercel
Leadership & process: Technical leadership, Kanban, technical documentation, AI-assisted development (Claude, GitHub Copilot)

EDUCATION, CERTIFICATIONS & LANGUAGES

B.Sc. Systems Engineering
2017 - 2022

Universidad de Investigación y Desarrollo (UDI) · COPNIA professional license · GPA 4.24 / 5.0

Ethical Hacking and Pentesting · Hacker Mentor 2024

Languages · Spanish (native) · English B2 (upper-intermediate)
